

**City of Port Colborne**  
**Public Information Centre for**  
**Storm Sewer System Infrastructure Needs Study, and**  
**Water Distribution System Infrastructure Needs Study**

The City of Port Colborne covers an area of approximately 12,380 ha with a serviced area of 2,388 ha and a population of approximately 19,200. The City provides storm drainage and water distribution to the City's customers.

The City of Port Colborne has prepared **Infrastructure Needs Studies** for the **Storm Sewer** and the **Water distribution Systems**. These Studies provide a comprehensive analysis and review of the City's storm sewer and water distribution networks to identify existing and potential future deficiencies related to the two systems.

The Studies will provide the City with strategies necessary to manage the required infrastructure improvements and growth in the most effective and efficient manner. The study will also identify the individual projects required to complement these strategies, and prioritize these projects based on need.

**STUDY AREA**

This Study is being conducted in accordance with the Master Plan Approach of the Municipal Class Environmental Assessment (Class EA) process. A Public Information Centre (PIC) will be held:

**Date:** Monday, November 24, 2014  
**Time:** 4:00 – 6:00 pm  
**Location:** Council Chambers, City Hall, 66 Charlotte Street
