

## PORT COLBORNE

### **PUBLIC NOTICE Spring 2018 - HYDRANT FLUSHING**

The City's Water/Wastewater Division of the Operational Services Department will be flushing hydrants from Monday, May 7, 2018 until Friday, June 22, 2018.

This work will be carried out in the evening hours between 12 - 8 a.m. all in an effort to minimize disruption of water service and inconvenience to our residents. This work is performed annually as part of the general maintenance of the water distribution system.

During this period residents may experience brief periods of discoloured water, limited water pressure and low volume. If discolouration occurs, running a cold water tap closest to your water meter for a short period of time should alleviate the problem. If you have any inquiries, please contact the Public Works Division at 905-835-5079.

Your understanding and cooperation in this matter is greatly appreciated.

Chris Lee  
Director of Engineering and Operations
